

INFORMATION FOR THE DIRECTOR'S LOG

The Department of State has advised this Agency that the ten per cent cost of living differential for posts [ ] shall be terminated by all Governmental departments and agencies at the beginning of the pay period following 29 August 1953. This action results from Department of State studies indicating that there has been a definite and steady improvement in living costs and that the only present hardship is a scarcity in suitable housing which, in itself, does not warrant the differential.
